Species	Date(s) Observed	Spawning	Rearing	Migration

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

On August 24, 1989 this stream was examined to determine upstream extent  
of anadromous (CO) fish habitat. The stream stairsteps and increases  
markedly in slope upstream from a point as shown on the attached map.  
Proposed logging of units in the vicinity of this stream within two years. T.735, R.824  
S.15

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
